Something for us to watch, fewer MI residents being served by MSU

MSU Class of:	MI residents	Other	% MI Students	
2022	79	36	69	
2023	80	34	70	← New Curriculum
2024	62	54	53	
2025	60	55	52	

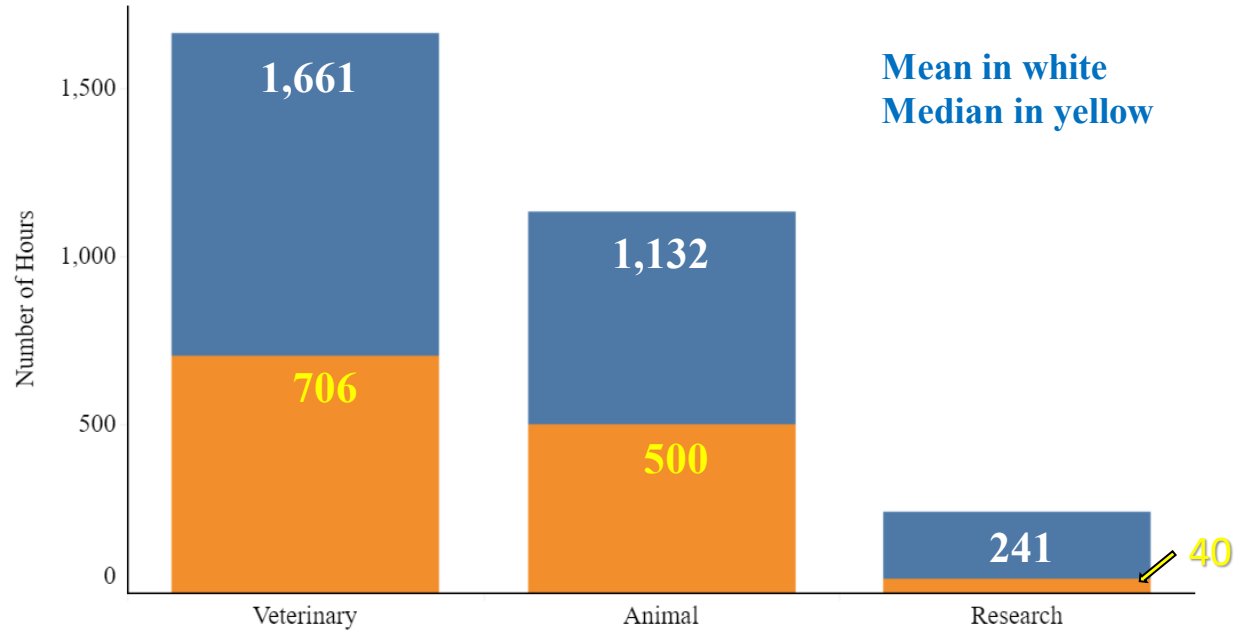

What to do to get into vet school (my perspective):

1. Take care of your coursework
2. Know the programs you will be applying/track requirements ([VMSAR](#))
3. Obtain diverse experiences for your vet hours (don't target minimums)
4. Demonstrate leadership
5. Obtain customer service experience
6. Demonstrate you understand what vet school will entail and cost
7. Have a compelling story – why you want to be a vet – what is your passion

**Mean & Median Experiential Hours
Applicants to the Class of 2025
Internal AAVMC Data Reports
2021**

**Cumulative hrs (mean): 3,034
No. 40-hr weeks: 76**

**Cumulative hrs (median): 1,246
No. 40-hr weeks: 31**

The mean experiential hours shown here should *not* be interpreted as recommendations by prospective applicants. Application requirements regarding experiential hours vary widely across the colleges of veterinary medicine, and applicants may be successful in earning admission with a portfolio of experiences that differ greatly than what is shown here.

This data simply represents the mean number by experience type reported by applicants to the class of 2025.

Competency-Based Veterinary Education:
CBVE framework

Domains of Competence

1		Clinical Reasoning and Decision-making
2		Individual Animal Care and Management
3		Animal Population Care and Management
4		Public Health
5		Communication
6		Collaboration
7		Professionalism and Professional Identity
8		Financial and Practice Management
9		Scholarship

DOMAIN 1

Clinical Reasoning and Decision-making

The graduate demonstrates critical thinking and problem solving to arrive at evidence-based decisions that consider animal and client needs, available resources, and social context.

COMPETENCIES		ILLUSTRATIVE SUBCOMPETENCIES
1.1	Gathers and assimilates relevant information about animals	<ul style="list-style-type: none"> a. Collects history b. Performs physical examination c. Interprets diagnostic test results d. Performs necropsy examination
1.2	Synthesizes and prioritizes problems to arrive at differential diagnoses	<ul style="list-style-type: none"> a. Identifies problems b. Creates refined problem list c. Prioritizes differential diagnoses
1.3	Creates and adjusts a diagnostic and/or treatment plan based on available evidence	<ul style="list-style-type: none"> a. Appraises available clinical information and acts accordingly despite uncertainty b. Explains justification for plan c. Re-evaluates animal or population in a timely manner to adjust plan d. Uses critical thinking to determine appropriate action when unexpected outcomes occur (e.g., complications, changed diagnosis)

1

Clinical Reasoning and Decision-making

COMPETENCIES		ILLUSTRATIVE SUBCOMPETENCIES
1.4	Incorporates animal welfare, client expectations, and economic considerations into the diagnostic or treatment plan	<ul style="list-style-type: none"> a. Considers disease in context of the whole animal and client b. Presents a range of options to the client c. Considers euthanasia as a management option when appropriate
1.5	Prioritizes situational urgency and allocates resources	<ul style="list-style-type: none"> a. Triage cases to address most urgent and important problems first b. Recognizes emergent situation and directs action c. Recognizes and responds to reportable, transboundary, epizootic, and emerging/re-emerging diseases
1.6	Adapts knowledge to varied scenarios and contexts	<ul style="list-style-type: none"> a. Extrapolates knowledge to novel species or situations b. Adjusts existing protocol or procedure when standard measures are unavailable
1.7	Recognizes limitations of knowledge, skill and resources and consults as needed	<ul style="list-style-type: none"> a. Identifies situations in which referral is warranted b. Consults experts both within and outside the veterinary profession

Work hard,
Play hard,
Enjoy the ride
